

ABDOU SADOU

Data Governance & MDM | Data Steward · Data Quality · Business Intelligence

(+44) 0791 869 5070 · sadou.m.abderrahmane@gmail.com · [linkedin.com/in/asadou](https://www.linkedin.com/in/asadou) · abdousadou.github.io

West Yorkshire, United Kingdom

Data professional (5+ years) specialising in data governance and master data management (MDM). Designs and deploys end-to-end governance frameworks: cataloguing and business glossaries, lineage, data quality, classification, data mapping and GDPR compliance (records of processing). ISO 8000 Master Data Quality Manager (ECCMA); trained by the CNIL (French data protection authority) and on Microsoft Purview. Hands-on practice demonstrated through two published open-source platforms (OpenMetadata, dbt, Soda, Splink). Proven consulting and university-teaching experience: user training and stakeholder data literacy.

KEY SKILLS

- **Data governance:** governance frameworks, data owner / data steward roles, cataloguing, business glossary, data dictionary, lineage, classification, data mapping, data-management procedures
- **Data quality & MDM:** quality rules and tests, profiling, deduplication, record linkage, survivorship rules, golden records, reference data, ISO 8000
- **GDPR compliance:** records of processing (CNIL template), data minimisation, data-subject rights, data security
- **Governance tooling:** OpenMetadata (catalogue, glossary, lineage), dbt (tests, documentation), Soda, Microsoft Purview
- **Databases & engineering:** PostgreSQL, SQL Server, Oracle, DuckDB, ETL/ELT, Docker
- **Programming & analytics:** Python (pandas, Splink, Streamlit), SQL, R, Apache Spark, Databricks, predictive modelling, A/B testing
- **BI & visualisation:** Power BI, Tableau, Dash, Excel
- **Cloud & big data:** AWS, Azure, Snowflake
- **Project delivery:** Agile, stakeholder management, user training, risk management

PROFESSIONAL EXPERIENCE

Data Consultant — One1Star Solutions

Oct 2023 – present · York, England

- Lead data-governance delivery: data mapping, role definitions (owners, stewards), usage and access rules; author GDPR-compliant data-management procedures.
- Made high-volume customer data reliable: quality and consistency controls, Power BI dashboards that sharpened market segmentation, automated consumer-behaviour analysis (Python, big data).
- Design and optimise ETL processes, data models and BI workflows; drive scalable cloud solutions enabling automation.
- Advise stakeholders on strategy, architecture evolution and technical debt.

Lecturer, Business & Data Analytics — University of Huddersfield

Jan 2023 – present · Huddersfield, England

- Teach business intelligence, data science and statistical analysis to master's students; supervise applied research projects in data and machine learning.
- SAP-accredited educator (SAP University Alliances): master data management and end-to-end S/4HANA Sales & Distribution, from master data to accounting and financial documents.
- Redesigned the document management and sharing system and automated business processes (Power Automate, Office 365), cutting time-to-access for critical resources.
- Train users on Python, SQL, Tableau and Power BI.

Analytics & Planning Engineer — Ooredoo ISP

Oct 2020 – Aug 2021 · Algiers, Algeria

- Built and tracked network-performance KPIs: 15% reduction in external complaints.
- Automated dashboards and reporting (Python, Pandas, Power BI); predictive analytics to optimise network-resource allocation.
- Designed the internal database (SQL, Oracle) making network-change history traceable and consistent: fewer errors and duplicates.

IP Engineer — Huawei Technologies

May 2020 – Oct 2020 · Algiers, Algeria

- Technical studies and low-level designs (LLD) for the modernisation of Algeria's ISP; configured and deployed NE40E routers, S12700 switches and NCE servers; supervised subcontractor teams.

IT Engineer — AGENOR

Oct 2018 – May 2020 · Algiers, Algeria

- BI reporting (Excel, SQL) for sales and finance; centralised multi-site infrastructure (Active Directory, VPN, Sophos XG) and hardened data security.
- Authored the company IT charter and governance policies, improving security and operational efficiency.

PROJECTS — GOVERNANCE & MDM (OPEN SOURCE)

Designed, built and published solo — demos, screenshots and code: abdousadou.github.io

Data governance platform on French open data

2026

PostgreSQL · dbt · OpenMetadata · Soda · Docker

- End-to-end governance platform over the DVF, SIRENE and COG open datasets (millions of rows): OpenMetadata catalogue, 25+-term French business glossary linked to assets, domains, owners and stewards.
- Column-level lineage end to end (pipelines → raw → marts) via dbt; 40+ quality rules across three layers (dbt-expectations, OpenMetadata native tests, Soda); quality-incident procedure validated by drill.
- GDPR compliance implemented and tested: masking of SIRENE "partial diffusion" records (French commercial code), column classification, records of processing (CNIL template), full provenance and licence tracking.

Company master data "golden records" (MDM)

2026

Python · Splink · DuckDB · PostgreSQL · Streamlit

- Full MDM pipeline: SIRENE national registry + 50,000-row synthetic CRM with ground truth; address standardisation via France's national address base (BAN); deterministic matching (SIRET/Luhn) then probabilistic (Splink).
- Attribute-level survivorship rules with a full provenance log; Streamlit stewardship console with review queue and re-runnable must-link / cannot-link decisions.
- Results measured against ground truth: F1 ≥ 0.95, SIRET completeness raised from ~40% to 95%+, residual duplicates ≤ 1%; auto-generated, ISO 8000-aligned quality report.

Inventara — inventory SaaS for the chemical industry

FastAPI · Next.js · PostgreSQL

- Product, third-party and warehouse reference data (lifecycle, referential integrity, controlled value lists); quality and traceability (FEFO batches, movement logs); encrypted off-site backups and personal-data minimisation.

CERTIFICATIONS & TRAINING

- ECCMA — ISO 8000 Master Data Quality Manager (MDQM) — Jul 2026
- CNIL (French data protection authority) — GDPR Workshop "L'Atelier RGPD" — 2026
- Microsoft — Data governance with Microsoft Purview, self-paced learning path — 2026
- Microsoft — Power BI Data Analyst, professional certificate — Mar 2025
- Google — Business Intelligence, professional certificate — Feb 2025
- Google — Advanced Data Analytics, professional certificate — Feb 2025

EDUCATION

- Postgraduate Certificate in Higher Education — University of Huddersfield — 2023–2024
- MSc Business Intelligence & Analytics — University of Huddersfield — 2021–2022
- MSc Computer Science (Telecommunications) — USTHB, Algiers — 2016–2018
- BSc Electronics — USTHB, Algiers — 2012–2015

LANGUAGES

French: fluent (DALF C2) · English: fluent · Arabic: native
